1

Protected workspace = faster cooking, less mess — run this every time, not just when it looks bad

Right towel for the right task: dish / hand / counter

2

Never mix them — dirty towels transfer bacteria directly to clean surfaces and dishes

Raw meat sealed on the fridge bottom shelf

3

If it drips, it drips down — not onto the food below it

Opened the last of something? Add it to the list right now

4

Not later. Not when you remember. Right now — before you put it down

Dishes done before bed, every night

- Check the 5 always-stocked categories: protein · grain · vegetable · sauce · fat
- Add any low/out items to the list immediately
- Check fridge for anything about to expire → plan a meal around it this week
